

The Children's Institute

Amazing Kids. Amazing Place.

Medical & Therapy Services at The Children's Institute of Pittsburgh

There simply is no place like The Children's Institute of Pittsburgh. It's the region's **most comprehensive provider** of care to children with special and orthopedic needs.

Our Hospital is committed to providing high quality, effective therapy services for children and adolescents. We care for nearly 300 inpatients and have nearly 70,000 outpatient visits per year. We continually advance our treatment methods—by using new techniques, as well as new technology—to produce better therapeutic interventions for children. We are the only CARF-accredited freestanding pediatric specialty rehabilitation hospital in the region, and one of only 5 in the nation.

Quite simply, The Children's Institute is your best choice for inpatient and outpatient pediatric rehabilitation.

Specialty Programs and Services

Brain Injury Rehabilitation

The only CARF-accredited inpatient pediatric brain rehabilitation program in Pennsylvania.

Spinal Cord Injury Rehabilitation

The only spinal cord injury rehabilitation program of its kind in Pennsylvania.

Pain Rehabilitation

The only facility in western Pennsylvania with an intensive treatment program for pediatric pain disorders.

Feeding & Swallowing

One of the only providers in the region with an intensive inpatient and outpatient pediatric feeding and swallowing program.

Prader-Willi Syndrome

The nation's only comprehensive treatment center for children and adults with Prader-Willi syndrome.

Orthopedic & Sports Rehabilitation

Inpatient and outpatient services for a wide range of athletic injuries.

Behavioral Health Services

Behavioral health and physical health clinicians collaborate to offer a unique integrated approach to pediatric health care.

The Children's Institute has received four coveted accreditations from CARF, the independent international Commission on Accreditation of Rehabilitation Facilities.

- Comprehensive Inpatient Rehabilitation Pediatric Specialty Program (only one in region)
- Inpatient Brain Injury Rehabilitation Pediatric Specialty Program (only one in PA)
- Outpatient Rehabilitation
- Single Service Pediatric Specialty Program (one of two in PA)

94%

of our families
would recommend
the Children's Institute

Our spacious, modern facilities include:

- 62 rehabilitation beds
- Specialized units for patients with brain injury and Prader-Willi syndrome
- Specialized area for patients with feeding disorders
- Seven therapy gyms
- Universal Exercise Units
- Locomotor Training
- E-stim bikes
- Two multi-sensory rooms
- Playrooms, art rooms, library
- Two therapeutic pools
- Therapeutic garden and playground
- Assistive technologies and augmentative devices
- Courtesy accommodations for families of out-of-town patients

Our four additional community locations offer outpatient services in Wexford, Irwin, Bridgeville and Pleasant Hills are also spacious and exceptionally well equipped.

Excellent outcomes

Even though many inpatients come to us acutely ill—sometimes still comatose or on ventilators—our rehabilitation is intensive and effective: while other facilities must discharge patients to long-term care, the great majority of our young patients can return directly to their lives.
